About Us

Bayer is a German life science company with over 150 years of history and core expertise in healthcare and agriculture.

Presence in Pakistan:

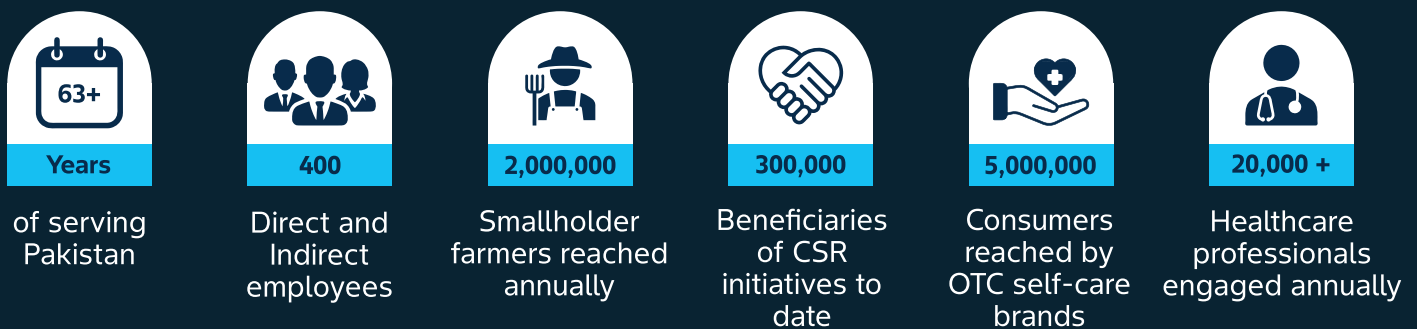

For over 63 years, Bayer has been a key player in Pakistan’s healthcare and agriculture sectors, advancing food security, nutrition, and health through science and innovation. Bayer operates in Pakistan as Bayer Pakistan (Pvt) Limited, incorporated in 1963.

Business Divisions

- Crop Science**
Tailored solutions to address farmers’ needs and challenges through high-quality seeds and crop protection products that enable efficient and sustainable agriculture
- Pharmaceuticals**
Provides high-quality prescription products, across a range of therapeutic areas to cater to the healthcare needs of a growing population
- Consumer Health**
Offers both non-prescription/OTC (over-the-counter) and prescription products, in categories including nutritional and digestive health

Our Impact

Our Past Social Initiatives:

Bayer Pakistan has been supporting CSE programs that create sustainable impact in underserved communities, focusing on healthcare access, vital resources, food security, and climate change mitigation.

The Kidney Centre (TKC)

Facility expansions, equipment costs and the funding of Free Filter Clinic during COVID, providing 14,000 patients access to healthcare.

The Citizen's Foundation (TCF)

Supported literacy and numeracy programs, benefiting over 112,000 direct and 700,000 indirect beneficiaries

Indus Hospital and Health Network (IHHN)

Partnered with Indus Hospital on COVID-19 care, self-care awareness, pharmaceutical donations, and blood donation drives.

Tayaba H2O Water Wheels

Distributed 6,000 H2O Water Wheels, improving access to water, sanitation, and hygiene for over 42,000 people

Pehli Kiran Family Clinics

In 2024, Bayer Foundation partnered with Mezrab, a non-profit social enterprise, to establish three Pehli Kiran Family Health Clinics in underserved neighborhoods of Karachi.

Inaugurated in March 2025, the clinics deliver sustainable primary care with a focus on women's reproductive health — including contraceptive access and referral for survivors of gender-based violence.

The first clinic, in Rasheedabad, opened on 11 March 2025, attended by Bayer Pakistan, Mezrab, and the Sindh Healthcare Commission.

2022 Flood Response

When the 2022 floods displaced millions across Pakistan, Bayer responded in two stages: relief then recovery.

Relief brought tents, food, and financial aid to 4,176 households, plus medical camps treating skin infections with Bayer employees worldwide funding 1,381 more families.

As waters receded, interest-free microfinance loans helped 600 farmers rebuild sustainably across 2023–2024.

5,500+
families supported

60,000+
patients treated
